FARHAN M N

Urban Planner | Civil Engineer | Urban Mobility & Infrastructure Planning

+971 56 932 3743 | farhanmnoushad@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Civil Engineer with a Master of Planning in Urban Planning, combining hands-on site engineering experience with urban mobility, GIS-based spatial analysis, and infrastructure planning. Site engineering background spans construction supervision, quantity estimation, material reconciliation, and QA/QC inspections, while planning experience covers the Local Area Plan process, land-use analysis, and evidence-based mobility research using GIS and survey methods. Backed by a Bachelor of Technology in Civil Engineering, comfortable bridging technical construction coordination with spatial and planning analysis on infrastructure projects.

PROFESSIONAL EXPERIENCE

Site Engineer **Mar 2024 – Mar 2025**

G Factree Infrasolutions Private Limited | North Paravur, Kerala

- Supervised daily site operations and coordinated multidisciplinary teams to keep construction activities aligned with schedule and budget, while tracking and reconciling material quantities to support cost control.
- Conducted QA/QC inspections against architectural and structural drawings and liaised with clients, consultants, and contractors on technical clarifications, approvals, and progress reporting.

Urban Planning Intern **May 2025 – Jun 2025**

Local Self Government Department (Planning) | Thrissur, Kerala

- Contributed to the Local Area Plan (LAP) process, supporting data collection and land use analysis for official planning documentation.
- Applied GIS-based spatial analysis and 3D modelling to produce visual representations of planning concepts for stakeholder presentations.
- Drafted planning proposals and Development Control Regulations for the Sakthan Thampuran Nagar Local Area Plan, Thrissur.

RESEARCH & TECHNICAL PROJECTS

Urban Mobility Equity in Indian Cities – Kochi Municipal Corporation Area | M.Plan Thesis

- Developed a four-dimensional urban mobility equity framework — accessibility, availability, affordability, and safety — and applied it through GIS-based spatial analysis, secondary data,

and a primary questionnaire survey across six analytical zones in the Kochi Municipal Corporation Area.

- Formulated planning recommendations including an integrated bus transit network, bus priority corridors, multimodal integration hubs, and a unified ticketing system, positioning the framework as a replicable methodology for equity-focused transport planning in other Indian cities.

AI-Enabled Smart Infrastructure – Ernakulam North-South Corridor | Academic Project

- Proposed a smart infrastructure framework integrating IoT sensors, real-time monitoring dashboards, and data analytics to explore data-driven mobility management and civic infrastructure services.

Surface Characteristics of Pervious Mortar as Pavement | B.Tech Project

- Investigated surface characteristics and performance indicators of pervious mortar mixes for pavement use, evaluating material composition against sustainable pavement design criteria.

CORE COMPETENCIES

Urban Planning: Urban Planning, Local Area Planning, Land Use Analysis, Spatial Planning

Civil Engineering: Construction Supervision, Site Coordination, QA/QC, Quantity Estimation, Cost Control, Structural Analysis

Urban Mobility & Transport: Mobility Planning, Transport Planning, Mobility Equity, Accessibility Analysis

GIS & Spatial Analysis: GIS, Spatial Analysis, QGIS, ArcGIS, Mapping

Research & Infrastructure: Urban Research, Evidence-Based Planning, Infrastructure Planning, Smart Infrastructure

EDUCATION

Bachelor of Technology in Civil Engineering 2020 – 2024

Universal Engineering College | Thrissur, Kerala

Master of Planning in Urban Planning 2024 – 2026

Government Engineering College | Thrissur, Kerala

SOFTWARE & LANGUAGES

Engineering: AutoCAD, STAAD.Pro, Primavera P6

GIS & Design: QGIS, ArcGIS, Adobe Photoshop

Productivity: Microsoft Office Suite

Languages: English, Malayalam, Hindi, Arabic
