

FARHAN M N

Civil Engineer | Urban Planner

+91 96452 09750 | farhanmnoushad@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Civil Engineer and graduate Urban Planner with hands-on experience in infrastructure design and site management, complemented by strong academic grounding in data-driven urban analysis. Holds a Master of Planning (Urban Planning) with academic projects focused on mobility equity, smart infrastructure, and climate-responsive urban systems. Proficient in AutoCAD, QGIS, and STAAD.Pro, with academic exposure to IoT and AI-enabled frameworks applied to urban mobility assessment and spatial analysis. Eager to translate engineering expertise and planning knowledge into real-world solutions for inclusive and future-ready cities.

CORE COMPETENCIES

Planning & Design: Urban Planning, Master Planning, Infrastructure Design, Land Use Analysis, Spatial Analysis

Engineering: Structural Analysis, Construction Management, QA/QC, Quantity Estimation, Cost Control

Technology: IoT-Enabled Smart Infrastructure, AI-Driven Decision Support, Data Analytics, 3D Modelling

Software: AutoCAD, QGIS, ArcGIS, STAAD.Pro, Primavera P6, Microsoft Office Suite, Adobe Photoshop

Soft Skills: Stakeholder Communication, Project Coordination, Critical Thinking, Team Collaboration

Languages: English, Malayalam, Hindi, Arabic

PROFESSIONAL EXPERIENCE

Site Engineer

Mar 2024 – Sep 2024

GFactree Architects and Engineers | North Paravur, Kerala

- Oversaw day-to-day site operations for construction projects, coordinating multidisciplinary teams to ensure timely and efficient execution within budget and schedule.
- Implemented cost control measures through systematic quantity tracking, estimation, and material reconciliation, reducing material wastage.
- Conducted regular QA/QC inspections to ensure full compliance with architectural drawings, structural specifications, and safety norms.
- Served as primary liaison between clients, consultants, and contractors; managed technical clarifications, approvals, and progress reporting.

Urban Planning Intern

May 2025

Local Self Government Department (Planning) | Thrissur, Kerala

- Assisted in the Local Area Plan (LAP) process, contributing to data collection, land use analysis, and preparation of official planning documentation.
- Supported urban analysis initiatives including spatial analysis, 3D modelling, and visual representation of planning concepts for stakeholder presentations.

ACADEMIC PROJECTS

Assessment of Urban Mobility Equity in Kochi Municipal Corporation Area | M.Plan Thesis

- Assessed urban mobility equity across the Kochi Municipal Corporation using a four-dimensional framework (accessibility, availability, affordability, safety), combining GIS-based spatial analysis, secondary data, and a primary questionnaire survey across six analytical zones.
- Developed planning proposals including an integrated bus transit network, bus priority corridors, multimodal integration hubs, and a unified ticketing system; findings offer a replicable methodology for equity-focused transport planning in Indian cities.

Urban Mobility Equity Index: Equity-Based Assessment Framework for Indian Cities | M.Plan Dissertation

- Developed a comprehensive mobility equity index to evaluate accessibility, availability, affordability, and safety across diverse Indian urban contexts.
- Produced evidence-based planning recommendations to inform equitable transit policy and investment decisions.

Urban Continuity Nodes (UCN) – Alappuzha Town

- Designed the technology and intelligence layer of the UCN framework, integrating IoT sensing networks, resilient communication infrastructure, and AI-driven decision support systems for post-disaster urban recovery.

AI-Enabled Smart Infrastructure – Ernakulam North-South Corridor

- Developed a smart infrastructure framework integrating IoT sensors, real-time monitoring dashboards, and data analytics to support mobility management, civic services, and responsive governance.

IoT-Driven Community Transformation – Ponnani Town

- Formulated a community transformation proposal integrating smart mobility, safety monitoring, and data analytics to support sustainable and inclusive urban development.

Surface Characteristics of Pervious Mortar as Pavement | B.Tech Project

- Investigated surface properties and performance indicators of pervious mortar mixes for pavement applications, contributing findings to sustainable infrastructure literature.

EDUCATION

Master of Planning in Urban Planning | 2024 – 2026

Government Engineering College | Thrissur, Kerala

Bachelor of Technology in Civil Engineering | 2020 – 2024

Universal Engineering College | Thrissur, Kerala

Higher Secondary Education | 2018 – 2020

SN Higher Secondary School | Irinjalakuda, Kerala
